Implications

In FY 13-14, 2011 Realignment did not result in a reduction to the number of youth served by THP-Plus or the rates paid.

THP-Plus will be an important resource in 2015, as youth begin to “age out” of extended foster care.

THP-Plus requires new approaches to engage youth in post-secondary education.

Additional outreach is required to enroll THP-Plus participants in Medi-Cal to age 26.

Implications

Additional consideration must be given to ensure THP-Plus and THP+FC are meeting the needs of parenting youth.

Despite significant growth, THP+FC requires additional expansion.

While providing valuable supportive services, THP+FC is not adequate for very high needs youth, such as those with serious mental illness.

Outcome data is required to ensure program quality.

Policy Update

THP+FC will receive a CNI increase for FY 14-15, retroactive to July 1, 2014.

On the Governor's Desk:

- **Senate Bill 1252**, which would provide counties with the option to allow youth in THP-Plus who are enrolled in school to participate for 36 months.
- **Senate Bill 1023**, which would create a new program for current and former foster youth within the existing EOPS program on community college campuses.
- **Assembly Bill 2668**, which would provide parenting youth in a SILP an extra \$200 if they enter into a Responsible Parenting Plan.
